CALF HANDLING EQUIPMENT

SPIN-ROLL CALF CRADLE

Save the effort, time, cost and backache while branding 100 calves an hour! This particular calf cradle has been especially developed to be simple, efficient and safe.

- Simple operation with reduced lost motion
- Spin-rolling, balanced on the weight centre by device, eliminates the effort.
- Fast without fatigue or jarring the calf.

- A clean convenient height and no backache.
- Free walk - through with no footboard to baulk.
- Portable to another yard or shed storage.
- Handles a bigger range of sizes.
- Reversible to either work side.
- Sturdily built of heavy RHS box section.

THE THROW DOWN CALF CRADLE

The throw down cradle is a simple but effective design. The cradle is mounted at the end of a race and we recommend that the cradle be bolted firmly down to a concrete slab. Once the beast is caught the cradle is then pulled over onto a tyre to break the fall. The calf cradle allows good access to any part of the animal once on the ground, allowing the user to carry out any animal husbandry treatments.

Features include:

- All steel construction
- Light and strong
- Quick and easy to use
- Positive catching motion
- Quick release
